Blinds and shutters for any room

We asked the leading trend agency, Trend Union in Paris, to create a collection of colours and fabrics that would complement any room. The result is breathtaking: Now you can fill your rooms with daylight and fresh air, soften the afternoon sun or blackout the light from your bedroom while enjoying the newest colours and patterns.

There's no match like the perfect match

Original VELUX blinds and shutters go hand-in-hand with VELUX roof windows. We manufacture the largest assortment of roof window blinds on the market and all of our sunscreening products guarantee you a perfect fit, a great look and long-lasting, reliable performance.

Just a Pick&Click!™ away

The patented VELUX Pick&Click!™ system makes installation fast and simple thanks to pre-fitted mounting brackets. And no matter what type of VELUX roof window you have – small or large, old or new – rest assured that all our blinds and shutters will fit flawlessly every time.

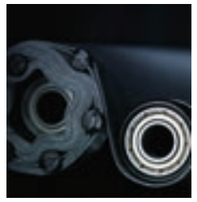
Pick&Click!®

A rainbow of colours

From hidden cords and slim designs to darkened blackout side rails and Oeko-tex fabrics, we always add that extra touch. So whether you need light control, heat protection, a sophisticated look or a splash of colour, you are sure to find the right blind for your needs. Simply choose from our wide range of blind types and select a colour or pattern that complements your room.

Comfort and convenience

We offer a variety of convenient ways to operate all of our blinds and shutters. You can choose from manual, electric or solar powered operation. Take advantage of our remote controlled, automated system when you opt for electric or solar and put comfort at your fingertips.



It's all in the details

Our high performance, award-winning blinds are also built to last. VELUX blinds and shutters are rigorously tested to ensure flawless operation even after years of everyday use and exposure to the elements. For generations, VELUX engineers and designers have been perfecting our products while developing innovative, patented solutions. That's why original VELUX blinds are the best and most trusted.

Improving your home's indoor climate

Your VELUX roof windows bring warmth and light into your home. Controlling these elements with the help of VELUX blinds and shutters is the key to achieving an ideal indoor climate in your home.

VELUX blinds and shutters provide extra insulation, daylight control and heat protection. In this way they can reduce your home's energy consumption by minimising heat loss during the winter as well as heat gain on a hot, sunny day. And with electric or solar powered operation, you get the added convenience of a touch screen control pad and the ability to programme everything to open and close at just the right times.

Protect your home against heat loss

Although modern roof windows are well insulated, interior VELUX energy blinds can further reduce heat loss by up to 19%. This extra insulation is especially important on a chilly night or during the winter months.

Protect your home against the heat from the sun

Passive heating from the sun is a major benefit on a cold day, but can lead to overheating in warmer months. VELUX roller shutters can reduce the heat impact of the sun by up to 97%. Even the classic VELUX awning blind reduces heat intake up to 73%.

The technical values of various accessories are determined through standardized tests and calculations, all in compliance with the international standards EN ISO 12567-2, EN 13363-2 and ISO 15099*. Effect depends on type of roof window and glazing.

Beware that when blinds are rolled down the risk of condensation is increased. Therefore rolling up the blind after use and ventilating regularly is recommended.

Reduce
heat intake
by up to 73% with VELUX awning blind

Day

On a sunny day, use your VELUX awning blind or roller shutter to control how much heat and light enters your home. On a chilly day, use the roller shutter to help keep out the cold.

Night

At night, your VELUX energy blind or roller shutter offer privacy and keep your home dark and warm.

Improve
insulation
by up to 19% with VELUX energy blind

VELUX awning blinds block the sun rays before they hit the pane.

Roman blinds for roof windows

Living room

Colour Collection by Scholten & Baijings

Internationally acclaimed designers, Scholten & Baijings have created six stunning VELUX Roman blinds patterns, inspired by daylight from dusk till dawn. The designs span from early morning sunrise over bright midday-light to intense nightglow.
All fabrics are cut individually, revealing the patterns differently, depending on how they are sculpted. This makes every blind a unique piece of art and every customer an artist. Since choosing may be hard, don't forget that all VELUX Roman blinds are really easy to change, and even easier to love!

Inspired by the way light changes from dusk till dawn, Scholten & Baijings have created six stunning designs exclusively for the VELUX Colour Collection.

All fabrics are cut individually, revealing the patterns differently depending on how they are sculpted.

Sunshine and shade for everyone

By opening up your home, roof windows bring the outside in and offer fantastic views. This bright, airy feel is especially important in the living room. A place where your family can come together, relax and connect each day, the living room should be welcoming and comfortable. VELUX original blinds make it all possible by providing complete light control, privacy and a decorative touch.

VELUX roller blinds come with slim aluminium side rails for smooth operation and a clean, classic look.

Choose your style

Dressing your living room with blinds enhance the look and design. Choose your favorite type of blind and the perfect colour to match your interior.

VELUX pleated blinds create a cosy, pleasant atmosphere by softly diffusing incoming daylight. They also offer privacy and can be positioned anywhere in the roof window. These elegant blinds are available in a wide range of colours and styles to compliment the décor of your living room.

If you are looking for stylish, basic light control and privacy, VELUX roller blinds are a good choice. They come in many colours and patterns.

All day comfort

To keep temperatures comfortable all day long, you can combine any interior blind with a VELUX awning blind. These transparent exterior blinds block the sun's rays before they hit your roof window pane to reduce passive heating by up to 73%.

With our new VELUX INTEGRA® touch-screen control pad, you can manage all of your home's motorised VELUX products in one place.

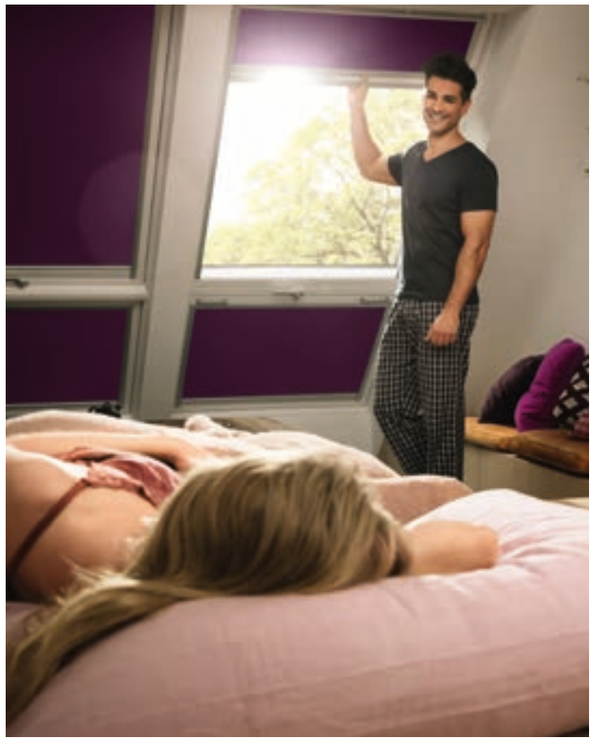
VELUX pleated blinds.

Creating your dream retreat

The perfect bedroom is a space where you can relax and recharge your batteries. Roof windows play a major role in making your bedroom comfortable and inviting by creating a bright, airy setting. But to get the most out of your roof windows, you need to able to adjust the incoming light or black it out entirely for a good night's sleep.



VELUX blackout blinds come in a range of colours and designs.

Daytime or dreamtime

If blackout is your only care, our standard blackout blinds offer a light proof seal to ensure a restful sleep even in the middle of the day.

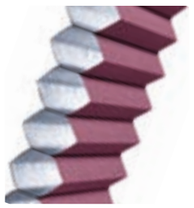
But do you often use the bedroom as a quiet space for reading or watching television, glare reduction is also important. VELUX energy blinds can be positioned anywhere in the roof window, so you can block the sun just where you need it and get privacy without sacrificing daylight or your view. When fully drawn, energy blinds effectively darken the room and add extra insulation.

If you want maximum comfort and light control, our duo blackout blind is a blackout blind and a pleated blind in one. VELUX duo blackout blinds offer the best of both worlds: Complete darkness anytime and softly diffused natural light all day long.

Cool comfort

For superior heat protection, any of our interior blinds can easily be combined with our exterior awning blind. The transparent material deflects the sun's rays before they hit your roof window to keep temperatures comfortable.

Looking for all-season insulation? Our durable, high performance roller shutters protect against the heat and cold while offering total blackout and reduced noise.



VELUX energy blinds have a honeycomb structure for exceptional insulation.

Exterior VELUX awning blinds reduce heat intake by up to 90%.

The VELUX duo blackout blind combines our blackout blind with our pleated blind in one.

Kids room

The right balance for play and sleep

A child's room is truly a multi-purpose space. By night, quiet and darkness are key for a peaceful sleep. But by day, the ability to adjust the incoming sunlight is important for ensuring a comfortable temperature and creating the right environment for play and homework. Blinds with round the clock benefits are the perfect fit for these versatile, lively spaces.

Day or night

An ideal solution in a child's room, the VELUX duo blackout blind combines the complete blackout of our blackout blind with the softly diffused daylight of our pleated blind.

The duo blackout blind is available in any of our 24 blackout blinds along with a white pleated blind. This provides a practical two in one solution that keeps out the sun during naptime or softly diffused light during playtime.

For variable blackout, VELUX energy blinds can be positioned anywhere in the roof window. They allow you to block direct sunlight while still letting in plenty of daylight, and their unique design provides improved insulation all year round. When fully drawn, our energy blinds darken the room to ensure a good night's sleep.

And for total darkness anytime, even during the day, our standard VELUX blackout blinds are available in a wide range of colours and designs to suit any room.

Climate control

For an even more comfortable temperature in your child's room, you can combine each of the interior blinds with an exterior VELUX awning blind that blocks the sun's rays.

Bug free zone

With VELUX insect screens you can let in the fresh air for a good nights sleep, without the buzz of unwanted visitors.

VELUX awning blinds block the sun's rays before they hit your roof window pane to reduce passive heating by up to 73%.

Add an awning blind to keep the room cool on sunny days, while still allowing fresh air in.

Total blackout
Create the perfect room for sleeping by effectively blocking all moonlight or sunlight.

Fresh air
Combine your blackout blind with an insect screen for added protection from mosquitoes and other insects.

Home office

Making the most of your spare room

Your home's extra room may cater to many needs. But whether your guest room doubles as a home office or a studio, blinds are an important part of creating the perfect setting. To make the most of this dynamic space, you should be able to softenincoming daylight as well as providing darkness and privacy when night falls.

For day and night

With VELUX energy blinds, you can block the sun just where you need it without sacrificing daylight or your view. Since they are not fixed at the top or bottom of the roof window, energy blinds are completely flexible. Just position the blind anywhere on your roof window to reduce the glare of direct sunlight or get some privacy. When fully drawn, energy blinds effectively darken the room to ensure your guests a good night's sleep. They also improve insulation by keeping your room warm during chilly nights.

If all you need is to soften incoming daylight, and create a cosy, pleasant atmosphere we recommend our pleated blinds. They also offer privacy and maximum flexibility when it comes to positioning.

VELUX Roman blinds are the perfect solution when you want to add more personality to your room. While still allowing you to regulate light intensity, they come in a variety of structures and shades. Some are designed to make light create beautiful patterns in the room, whereas others add an artistic edge.

Whatever atmosphere you prefer, we have the perfect solution.

VELUX energy blinds can be positioned anywhere in the roof window for a decorative lighting effect.

Stay cool

For sunny rooms, a VELUX awning blind on the outside of your roof window can help keep your room from getting too warm on a bright day. VELUX awning blinds are transparent, so you will still enjoy plenty of daylight and an unobstructed view. Awning binds can be combined with any VELUX interior blinds.

VELUX Roman blinds come in a variety of shades and structures.

Solar powered roller shutters work day or night, rain or shine without wiring or a connection to a power supply.

VELUX pleated blinds.

Your private oasis

Roof windows can fill any bathroom with natural light and fresh air. The extra daylight gives the room a more open, spacious feel and these high moisture areas benefit from ventilation via the roof window. But since privacy is just as important as sunshine in the bathroom, VELUX original blinds are essential.

Privacy and style

Whether you are getting dressed for the day or relaxing in the tub, natural light and privacy are important elements in your bathroom. With VELUX Venetian blinds you can have it all, just tilt the slats in any direction to adjust the angle of the light and achieve the right amount of privacy. These cordless, moisture resistant blinds are easy to clean, and they come in nine different colours to suit your personal style and decor.

Brighten your bath

For flexible privacy while maintaining a view out, our elegant pleated blinds can be positioned anywhere in the roof window. They bathe your room in softly diffused sunlight and come in 20 different colours and designs, making it simple to add a contemporary feel to any bathroom.

VELUX Venetian blinds have no hanging cords, so they are safe and easy to use.

Low-maintenance Venetian blinds add beauty and privacy to your bathroom.

VELUX Venetian blind.

Kitchen

Cooking in style and comfort

Because the kitchen is often the busiest room in the home, your blinds need to be as practical as they are beautiful. Roof windows are a huge asset in a warm, active kitchen because they provide exceptional ventilation. And since cooking produces steam and residue, your blinds also need to be able to take the heat.

VELUX insect screens are made of a durable, transparent net fabric.

High performance blinds

Easy to clean VELUX Venetian blinds are the perfect choice for a kitchen. Not only are these blinds water and stain resistant, they are also simple to operate. Breakfast, lunch or dinner, Venetian blinds let you adjust the amount of incoming light for maximum comfort.

Farewell, uninvited dinner guests

Enjoy your meals with family and friends, not insects. VELUX insect screens fit perfectly with your VELUX roof window to keep even the smallest pests out without affecting your view. Combine them with any of our blinds to create the perfect, bug-free solution for your kitchen.

VELUX insect screen stores neatly in its top case when not in use.

Roller shutter

From full daylight to complete blackout, VELUX roller shutters bring you additional energy saving and noise reduction in an award winning design.

All-round benefits

Roller shutters prevent the loss of energy, keeping your room warm in the winter and enabling you to completely block out all light from the roof window at any time. They offer noise reduction during hail and rain, protect your roof windows during harsh weather, and provide additional security for your home.

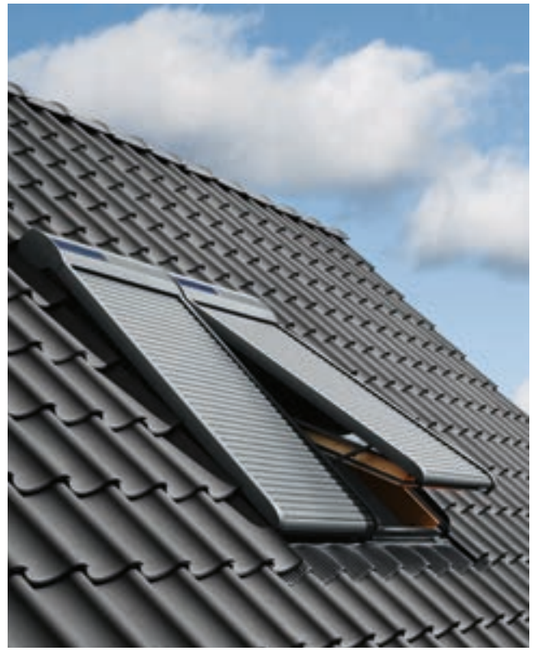
Best of all, our roller shutters are built to last. They are made of hard-wearing aluminium to ensure top performance no matter what nature throws at them. We rigorously test them in the most extreme conditions to ensure complete weather resistance and years of flawless operation.

Integrated design

Our roller shutters fit perfectly with your VELUX roof windows so installation is simple from outside or inside your home. VELUX roller shutters with their sleek top casing, form an integrated part of your roof, regardless of roofing materials. VELUX roller shutters have been awarded the Red Dot design award and the IF product design award for their many innovative design features.

Custom control

You can choose from manual, electric or solar powered operation. And to adjust and soften incoming daylight, VELUX roller shutters can easily be combined with any of our interior blinds.



VELUX roller shutters allow you to open your roof window in three different positions to let in light and air while keeping out the heat.

Solar powered roller shutters work day or night, rain or shine without wiring or a connection to a power supply.

Manual Electric Solar

Interior VELUX Roman blinds combined with exterior roller shutters.

Awning blinds

For a cool summer room VELUX awning blinds provide solar heat reduction whilst maintaining the view through your roof window.

It's not just light we control

External awning blinds are the perfect way to keep a room cool by reducing the amount of heat entering through the roof window by up to 73%. Especially suited to South facing roof windows the blind stops the heat from the sun reaching the glass and radiating into the room.

Their design also means they allow a pleasant diffused light to enter the room as well.

Designed to integrate perfectly with your VELUX roof window, the awning is made from weather resistant net fabric. When not in use the external blind rolls up and is kept out of sight. For additional light control and comfort, VELUX awning blinds can be combined with any interior VELUX blind.

VELUX awning blinds.

Operation

VELUX awning blinds are available in manual, electric (for use with VELUX INTEGRA® electric roof windows) or solar powered operation (for use with solar or manual roof windows). The manual awning blind can either be rolled fully up or fully down. To roll down, rotate the roof window 180° and fix to the hooks on the bottom of the sash. Electric awning blinds put heat control at your fingertips and can be controlled from anywhere in the room. The solar awning blind comes complete with a battery operated remote control.

With our new VELUX INTEGRA® touch-screen control pad, you can manage all of your home's automated VELUX products in one place.

Exterior VELUX awning blinds reduce heat intake by up to 73%.

Flat roof sunscreening

VELUX awning blinds for flat roof windows – MSG

Installed between the roof window and the dome, transparent awning blinds are solar powered and operated by remote control. They keep temperatures comfortable by filtering the strong rays of the sun. Awning blinds are io-homecontrol® compatible and easy to install. Not suitable for flat roof windows fitted with opaque domes.

VELUX pleated blinds for flat roof windows – FMG

Perfect for softening incoming daylight and adding a decorative touch, pleated blinds open and close with a handy remote control. They are io-homecontrol® compatible and available in three colours.

See page 47 for prices and colours.

KUX 110 – Additional control system that allows FMG blind to be fitted to CFP fixed flat roof window. Requires separate installation and power supply – £112.80.

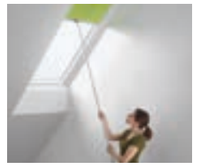
Accessories

Control pad
KLR 200 £144.00

Upgrade your VELUX solar blind or VELUX INTEGRA® roof window manufactured after 2005 with this fully programmable touch screen control pad.

Control unit
KUX 110 £112.80

The control unit is for operation of an electrically operated blind on a manual roof window. The system consists of a control unit and a remote control.



Pole Control
ZCT 200K £30.00

The VELUX telescopic pole makes it easy to manually operate centre-pivot roof windows or out of reach blinds when fitted with the correct adaptor. The pole extends from 100-180cm.

Pole Adaptors
ZOZ 085 £7.20

Pole adaptor for VELUX manual blinds that are out of reach. Use along with the control pole for simple operation.

Security Lock
ZOZ 012K £50.40

Key operated roof window lock for GGL and GGU centre-pivot roof windows only. Security locks cannot be used on top-hung roof windows GPL, GPU, GHL and GHU.

Opening Restrictor
ZOZ 010K S011 £50.40

Regulate the extent to which your VELUX roof window opens with this easy to fit safety catch. Opening restrictors cannot be used on top-hung roof windows GPL, GPU, GHL and GHU.
